Acknowledgements

At the end of this thesis I would like to express my gratitude to the people who contributed to my work. Especially it is a great pleasure to thank my promotor Prof. dr. Jasper Knoester for the invitation to come to Groningen, for the very professional scientific support during my work here, and constance interest in my research. I am very thankful for the very intensive and very fruitful collaboration with dr. V.A. Malyshev. I would like to thank Prof. dr. H.P. Trommsdorff for stimulating discussions during my stay at the Joseph Fourier University and dr. Jean-Pierre Lemaistre for the pleasant collaboration enabled by a POLONIUM grant. I would like to thank Prof. dr. hab. S.G. Rohoziński and dr. hab. E.A. Bartnik for scientific support during my work at Institute of Theoretical Physics in Warsaw.

The work described in this thesis has been performed at the Institute for Theoretical Physics at the Rijksuniversiteit Groningen and was supported by the following Institutions and Programs:

- i) Material Science Centre at the Rijksuniversiteit Groningen,
- ii) Institute of Theoretical Physics, Faculty of Physics, Warsaw University,
- iii) Nuffic in the Netherlands through a Huygens Fellowship,
- iv) Polish - French Cooperation Program POLONIUM.
